**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9, 10 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Baxter et al.

There is disclosed in Baxter a device for the production of a beverage by infusion of a ground product, comprising an infusion chamber 2 able to receive the ground product, a circuit of hot water (formed by a hot water inlet to the chamber and an outlet therefrom) crossing the infusion chamber, and means (reversible pump) for circulating the hot water in the circuit so that hot water can be circulated through the chamber in an opposite direction.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Baxter et al. in view of Blanc '108.

Blanc discloses that it is known in the art to use a pre-packaged dose of ground product with an infusion device.

It would have been obvious to one skilled in the art to provide the device of Baxter with the pre-packaged coffee products taught in Blanc, in order to eliminate the need for measuring an amount of coffee product into the infusion chamber.

***Allowable Subject Matter***

Claims 11-14, 17 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to King and Enomoto are cited for their disclosure of the state of the art.
